Color ........................................................................... 60º Lovibond

ITEM NUMBER
7050 .................................................. Whole Kernel, 50-pound bag
5665 .................................................. Preground, 50-pound bag

CERTIFICATION
Kosher: UMK Pareve

STORAGE AND SHELF LIFE
Store in a temperate, low humidity, pest free environment at temperatures of <90 ºF. Improperly stored malts are prone to loss of freshness and flavor. Whole kernel diastatic and preground malts are best when used within 6 months from date of manufacture. Whole kernel roasted malts may begin experiencing a slight flavor loss after 18 months.

AVERAGE SENSORY PROFILE*

*The average sensory profile shows the intensity of flavors and aromas perceived in a Congress Mash wort by the Briess Malt Sensory Panel. Usage will influence how these flavors are perceived in the final beer.
Caramel Munich 60L Malt *(Continued)*

**FLAVOR & COLOR CHARACTERISTICS**

- Malt Style: Caramel Malt
- Flavor: Caramel, roasted, malty
- Color: Amber to red hues

**CHARACTERISTICS / APPLICATIONS**

- Produced in the U.S.A. from AMBA/BMBRI recommended 2-Row malting varieties.
- Frequently used in IPA, Pale Ale, Oktoberfest and Porters.

They represent average values, not to be considered as guarantees, expressed or implied, nor as a condition of sale. The product information contained herein is correct, to the best of our knowledge. As the statements are intended only as a source of information, no statement is to be construed as violating any patent or copyright.

1 The parameters of a Congress Mash include malt grind, liquor-to-grist-ratio, temperature ramps and holds, and filtration. The process uses 50 grams of malt and 400 milliliters of water. Conversion is usually complete within 2.5 hours with a final conversion step of 70ºC (158ºF). This mash determines extract, viscosity, color, beta glucans, turbidity and soluble protein.
