BLACKPRINZ® MALT

FEATURES & BENEFITS
Produced in the U.S.A.

APPLICATIONS
Contributes the same color characteristics as Black Malt but without the bitter, astringent, dry flavors or aftertaste

MALT STYLE
Bitterless Black Malt

SENSORY CHARACTERISTICS
Color: Dark brown to black
Flavor: Subtle, smooth
No bitter, astringent, dry flavors or aftertaste
Very delicate, clean flavor
Mild roasted malty flavor

SUGGESTED USAGE RATES
1-2% Minor color adjustment with little to no flavor impact in lighter colored lagers and ales
2-5% Adds color with subtle, smooth flavor
5-10% Use in larger quantities for color plus mild roasted malty flavor

AVERAGE SENSORY PROFILE*

*The average sensory profile shows the intensity of flavors and aromas perceived in a Hot Steep wort by the Briess Malt Sensory Panel. Usage will influence how these flavors are perceived in the final beer.

CHARACTERISTICS
- Produced from hulless barley and functions as a 1:1 replacement to debittered Black Malt, but with smoother flavor. That’s because debittered black malts are made by removing a great deal of the husk, but not all of it. Since husk develops bitter notes during roasting, debittered black malts will contribute a certain amount of bitter, astringent, or dry flavors or after taste to beer.
- Use in Black IPAs, Black Lagers, Black Ales, Schwarzbiers and other beers for deep, rich color with only hints of subtle roasted flavor, and for color adjustment in any beer style.

TYPICAL ANALYSIS
Moisture: 6.0%
Color: 500 SRM

ITEM NUMBER
6533: Whole Kernel, 50-pound bag
6643: Preground, 50-pound bag

CERTIFICATION
Kosher: UMK Pareve

STORAGE AND SHELF LIFE
Store in a temperate, low humidity, pest free environment at temperatures of <90 °F. Improperly stored malts are prone to loss of freshness and flavor. Whole kernel roasted malts may begin experiencing a slight flavor loss after 18 months from date of manufacture.
