TYPICAL ANALYSIS
Mealy / Half / Glassy ............................................. 100% / 0% / 0%
Plump ........................................................................... 90%
Thru ................................................................................ 2%
Moisture ...................................................................... 4.5%
Extract FG, Dry Basis ................................................ 81.0%
Extract CG, Dry Basis ................................................ 79.5%
Protein....................................................................... 11.3%
S/T ................................................................................ 37.0
Alpha Amylase .......................................................... 80
Diastatic Power (Lintner) ............................................... 170
Color ..................................................................... 1.2 SRM

ITEM NUMBER
5303 .................................................. Whole Kernel, 50-pound bag
5603 .......................................... Preground, 50-pound bag

CERTIFICATION
Kosher: UMK Pareve

STORAGE AND SHELF LIFE
Store in a temperate, low humidity, pest free environment at temperatures of <90 ºF. Improperly stored malts are prone to loss of freshness and flavor. Whole kernel diastatic and preground malts are best when used within 6 months from date of manufacture.

APPLICATIONS
Exceptionally light-colored base malt that produces a very light colored, clean, crisp wort

MALT STYLE
Base malt

SENSORY CHARACTERISTICS
Color ....................................................... Very light color contribution
Lightest colored base malt available
Flavor ..................................................... Clean, sweet, delicate malty

SUGGESTED USAGE RATES
Up to 100% of the base malt of any beer style needing delicate, malt flavor

AVERAGE SENSORY PROFILE*

CHARACTERISTICS
- Use as a base malt for all beer styles
- Allows the full flavor of specialty malts to shine through
- Excellent choice for lagers

*The average sensory profile shows the intensity of flavors and aromas perceived in a Hot Steep wort by the Briess Malt Sensory Panel. Usage will influence how these flavors are perceived in the final beer.
